DETAILED ACTION

1. This office action is in response to application 10/709,376 and amendment filed on 9/18/2006. Claims 1-3, 5, 7-9, 11, 13-15 and 17 remain pending in the application, where claims 4, 6, 10, 12, 16 and 18 are canceled.

EXAMINER'S STATEMENT AS TO THE REASONS FOR ALLOWANCE

2. Claims 1-3, 5, 7-9, 11, 13-15 and 17 are allowed over the prior art of record.

3. The following is an examiner's statement of reasons for allowance: the prior art of record does not teach or fairly suggest a method/program product/system for performing static timing analysis on an integrated circuit design comprising performing static timing analysis on a final circuit netlist file utilizing a snip file generated, wherein the snip file includes signals and/or timing paths that are not subject to said static timing analysis; if the final circuit netlist file meets all timing constraints, the snip file is converted to a group of cutpoints; then a determination is made as to whether or not the cutpoints pass formal verification; if the cutpoints pass formal verification, the user analysis on the final circuit netlist file is complete and the final circuit netlist file can be sent to manufacturing; otherwise, if the cutpoints do not pass formal verification, a flag is issued to alert a user. The user then has either modify certain snip point(s) within the snip file or modify the final circuit netlist file, and perform the user analysis again.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
